

The Playground  
Inspection App

*Save time & cut out the paperwork with our playground inspection app*

the **play inspection** company

*the safest hands around playgrounds*

Save time and eliminate  
paperwork with our unique  
playground inspection app.

Finding ways to save time while simultaneously improving processes makes great business sense – and our innovative Play Inspection App delivers on both levels.

Designed for local authorities and their contractors, this reliable and robust piece of software will help you to ensure compliance and work smarter.

The Play Inspection App streamlines the entire inspection procedure, from site visit through to secure data storage. Whether it's a new or regular inspection, you can work through every item efficiently and effectively, using the easy and intuitive

step-by-step on-screen prompts. It's not just made for playground inspections either – if you have other assets that require compliance inspections, we can adapt the platform to suit your needs.

Developed by inspectors for inspectors, the many benefits offered by this app include:

- Paper-free solution
- Designed for 7" Android tablet - lightweight and practical
- No internet connection needed
- Simple and user-friendly
- Safe and secure storage on our cloud-based server
- Access to all your inspections anytime, anywhere
- Helps you to comply with safety legislation

Our web based management console allows all data to be stored safely while allowing you to locate and open your reports anytime you need them.

By eliminating paperwork, you have the peace of mind that your inspections are securely backed-up with no risk of missing files.

The app is offered as a standalone product, or we can provide you with a pre-loaded tablet package if required.

### Inspect, report and store – as easy as 1, 2, 3

The beauty of the Playground Inspection App is that it gives you the ability to record all of your site findings at the touch of a button. The navigation has been designed to allow every compliance check to be conducted via a series of on-screen selection options - just work through each step and then create and save your inspection report when you're done.

The secure storage facility also means that repeat inspections are quicker and easier to conduct. Simply retrieve the data from your last inspection and reassess each piece of equipment as recorded on the previous report, adding new items if needed.

### Features and functions of the app include:

- Offline mode - use the software even when you're not online
- Select site function - retrieve information quickly
- Create new report - easily add new sites as required
- Inspection screen - work through each item that needs assessing
- Record findings for each individual piece of equipment

- Take photos or choose from gallery
- Update details as you go
- Instantly create inspection reports at end of process
- Publish report and save straight to the secure server

The Play Inspection App will simplify your compliance processes and allow you to meet work demands much more efficiently. It's the most modern, functional and user-friendly software of its kind available on the market today.
